In case of this error in wireshark:

Do the following steps:
1) Open Terminal
2) Cmd: **whoami** → this will return a **<username>**
3) Copy paste the following commands:
    a) `sudo dpkg-reconfigure wireshark-common`
    b) `sudo usermod -a -G wireshark <USERNAME>`
    c) `pkill -KILL -u <USERNAME>`
4) Wait till the Ubuntu "restarts"
5) Open wireshark and continue your work
